

# National Study Unlocks Entryway's Impact on Home Values

Thousands of Homebuyers Surveyed Nationwide

MAUMEE, OHIO -- The perceived value of a home rises when it features an enhanced entryway -- that's the conclusion of a study by TNS, an independent research firm. TNS asked participants to estimate the value of various homes. Half saw homes with 6 panel doors, while half saw the same homes with an enhanced entryway -- a complete door system including decorative glass, sidelites and a transom. Homes with enhanced entryways were perceived as worth significantly more than the very same homes without enhanced entryways. This increase in the home's value

As the nation's leading manufacturer of residential door systems, we've always believed a more attractive entryway meant more value in a homebuyer's eyes. Now, independent research confirms it. See how Therma-Tru's beautiful

collection of fiberglass door systems can enhance your home.
